DETAILED ACTION

1. Applicant's election with traverse of Group II in Paper No. 9 is acknowledged. The traversal is on the ground(s) that there is no evidence of record to show that the claimed compositions are useful in the treatment of neoplastic diseases. This is not found persuasive because the submitted prior art of Miles et al (Critical reviews in clinical laboratory sciences) itself provides evidence of melatonin's use for said disease states (pages 243-246) .

The requirement is still deemed proper and is therefore made FINAL.

Claims included in the prosecution are 13 and 15.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 15 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

'other ingredients' in claim 15 is indefinite since it does not clearly define the components. Furthermore, it is unclear as to how by just incorporating melatonin in the

Art Unit: :1615

composition without administering would enable the treatment or prevention of brain edema as recited in this claim.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 13 and 15 are rejected under 35 U.S.C. 102(b) as being anticipated by WO 97/20555 or Vakkuri (Life Sciences, 1985) or Aldhous (Br. J. Of Clinical Pharmacology ,1985) all are of record.

The references of WO, Vaccuri, and Aldhous each teach compositions containing melatonin (note pages 9-14 of WO; Method section in Vakkuri); pages 517 and 518 of Aldhous).

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to *G.S. Kishore* whose telephone number is (703) 308-2440.

The examiner can normally be reached on Monday-Thursday from 6:30 A.M. to 4:00 P.M. The examiner can also be reached on alternate Fridays.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, T.K. Page, can be reached on (703)308-2927. The fax phone number for this Group is (703)305-3592.

Communications via Internet e-mail regarding this application, other than those under 35 U.S.C. 132 or which otherwise require a signature, may be used by the applicant and should be addressed to [thurman.page@uspto.gov].

All Internet e-mail communications will be made of record in the application file. PTO employees do not engage in Internet communications where there exists a possibility that sensitive information could be identified or exchanged unless the record includes a properly signed express waiver of the confidentiality requirements of 35 U.S.C. 122. This is more clearly set forth in the Interim Internet Usage Policy published in the Official Gazette of the Patent and Trademark on February 25, 1997 at 1195 OG 89.
